Summary

Third year Computer Engineering student with a strong foundation in data structures, operating system, object oriented programming, and computer networks. Experienced in building real world projects based systems and application development. Passionate about problem solving, system design, and leveraging technology to develop efficient and scalable solutions.

Education

- Bachelors of Technology in Computer Engineering from **K. K. Wagh College Of Engineering, Nashik(09/2024 - present) ; GPA: 9.10**
- HSC from **S.V.V.M. College, Wada (2024) ; Percentage: 88.50%**
- SSC from **G.D.K. Gurukul School, Vasind (2022) ; Percentage: 89.80%**

Work Experience

- Developed web-based applications using HTML, CSS, JavaScript, React, Node.js, and MongoDB, gaining hands-on experience in full-stack development.
- Worked on team-based engineering projects, utilizing problem-solving, debugging, and software development methodologies to deliver project objectives.
- Continuously enhanced technical skills through self-learning, online courses, coding practice, and personal projects.

Skills

- CPP, Java, Python, HTML, CSS, OOP, C-Programming, Javascript.
- **Tools & Technologies:** Git, MongoDB, VS Code, Figma, MS excel, Blender, IntelliJ IDEA.

Projects

- **DigiKumbh – Traffic & Parking Management System**

Developed a web-based traffic and parking management platform using MongoDB, Express.js, React.js, and Node.js (MERN Stack) for large-scale events. Implemented interactive parking maps, real-time parking availability, and online booking functionality. Integrated backend APIs for live data updates and smart parking recommendations to optimize vehicle distribution. Designed a responsive and user-friendly interface to enhance traffic management and visitor experience.

- **Hostel Management System**

Designed and developed a full-stack Hostel Management System using Java Spring Boot and MongoDB to digitize and streamline residential operations such as student registration, room allocation, fine management, and complaint tracking. Implemented structured MongoDB database management for efficient data handling and integrated multiple role-based features for both admin and student panels with a focus on usability, modular REST API design, and seamless interaction between the frontend interface and backend services.
